Security training

Spot the phish

Five minutes that protect the whole office

What phishing is

- An email pretending to be someone you trust
- It wants a **click**, a **password** or a **payment**

Four warning signs

- **Pressure**: “act now or lose access”
- **A sender address** that is almost right
- **Links** that go somewhere unexpected
- **Requests** to pay or change bank details

If you are not sure

- Don’t click or reply
- Press **Report phishing** in your mail app
- Already clicked? Report it and change your password

Remember

Stop. Check the sender. Report it.
